# PENTEQ® LaserWorkstation - LG 100

Penteq LG100 desktop laser system is a compact and user-friendly laser class 1 system for economical marking of workpieces made of various materials such as: steel, stainless steel, aluminum, anodized aluminum, brass and numerous plastics

#### Seamlessly integrable

Standardized interfaces ensure problem-free integration into an existing software infrastructure.

Dynamic data transfer from ERP systems, order management and needs-based processing, documentation and archiving of processed jobs are software modules that are customized.

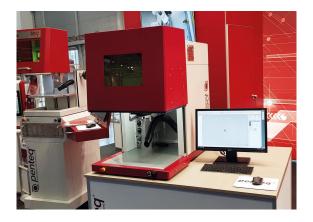

#### Function modules

The LG 100 can be equipped with various function modules like FM rotary axis, PSA SmartAdjust and customer-specific workpiece carriers.

The workpiece carriers are euqiped with a quick-change unit.

#### Solid industrial design

The rigid and powder-coated steel construction is designed for many years of industrial use.

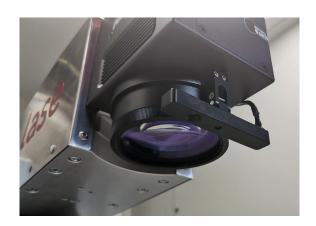

The basic version includes all components required for setup and operation

#### Consistent product tracking

In conjunction with the PenApp Track`n Trace, a continuous product tracking system can be installed that takes into account the customer-specific requirements.

The PenApp is characterized by particularly high Ease of use and is suitable for iOs, Android and Windows...

## Optional vision systems

PenVision Smart Adjust reduces set-up time and enables exact positioning of the labeling layout.

PenVision Verifier enables standard-compliant quality testing of applied Data Matrix codes according to ISO / IEC TR 29158.
